Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- <https://mc.webvisor.org/metrika/advert.gif> (60 minutes)

Reduce server response time

In our test, your server responded in 0.25 seconds.

There are many factors that can slow down your server response time. [Please read our recommendations](#) to learn how you can monitor and measure where your server is spending the most time.

Consider Fixing:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `` and 2 others are close to other tap targets final.
- The tap target `` and 6 others are close to other tap targets.
- The tap target `` is close to 1 other tap targets final.
- The tap target `044 599 00 56` and 2 others are close to other tap targets.
- The tap target `067 500 40 44` is close to 2 other tap targets final.
